NOTICE OF STUDY COMMENCEMENT

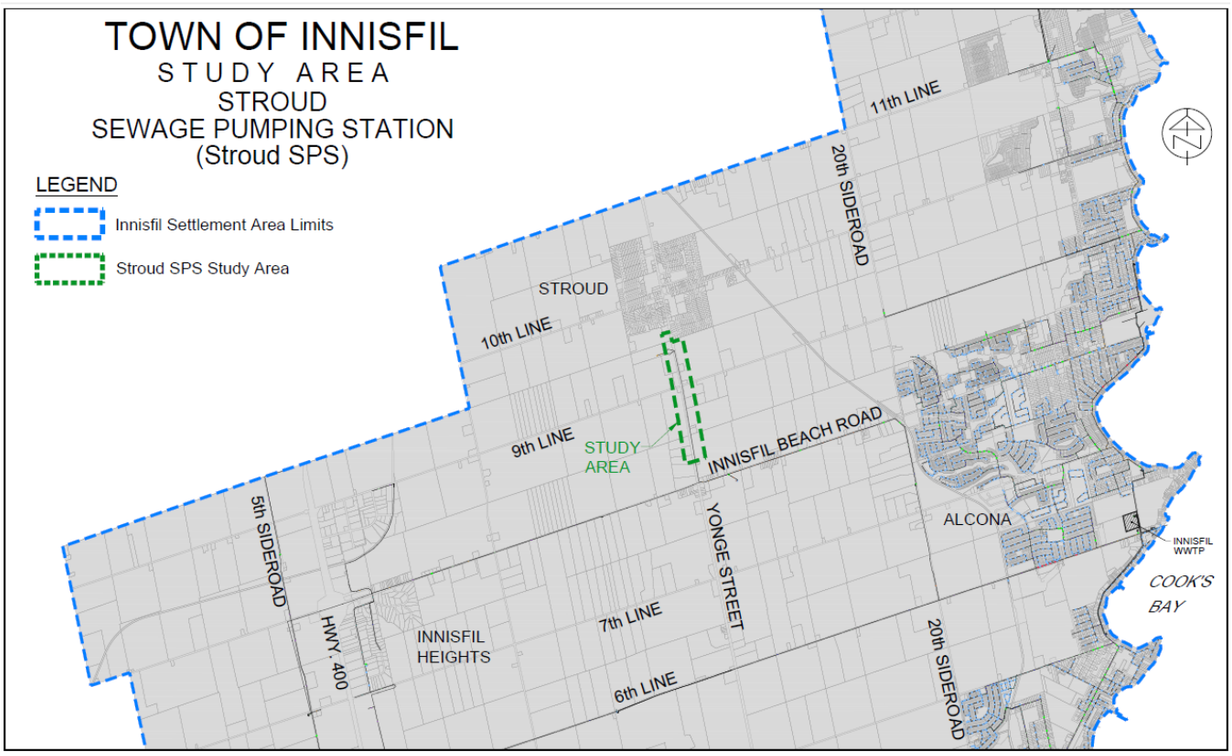
Class Environmental Assessment – Stroud Sewage Pumping Station

The Study

InnServices Utilities Inc. completed a Master Servicing Plan (MSP) update in 2018 which identified short- and long-term strategies for water and wastewater servicing to accommodate population and employment growth outlined in the Innisfil Official Plan (2018). Under Section 18.4 of the MSP, Recommended Wastewater Master Servicing Plan, the project involving the construction of the Stroud SPS and forcemain was suggested for implementation under the long-term timeline (post-2031). An amendment was sought to implement the Stroud SPS and forcemain project in advance of the timeline proposed in the MSP triggered by proposed new development in the area.

The proposed SPS will require a Schedule B Municipal Class Environmental Assessment (MCEA) prior to its construction. This Notice of Commencement is for the proposed new Stroud Sewage Pumping Station to be located on Yonge Street in of the Town of Innisfil. The sewage pumping station will receive flows from new development in Stroud and direct it to the Lakeshore Wastewater Treatment Plant.

The Stroud Sewage Pumping Station study area is proposed to be located on Yonge Street between the south end of Stroud and Innisfil Beach Road as illustrated on the accompanying map.



The Process

InnServices has retained Ainley Group to complete and document a Schedule B Class EA in accordance with the Municipal Class Environmental Assessment Document, October 2000, as amended in 2015.

How to Get Involved

Public consultation is a key component of the Class EA process. Additional information will be made available once alternatives have been identified and evaluated. Advance notice will be provided to allow all interested parties an opportunity to comment. For further information regarding the project, please contact either of the following members of the study team:

Jenna DeGroote, C.E.T.
Capital Project Manager
InnServices Utilities Inc.
7251 Yonge Street
Innisfil, ON
