

## STROUD WATER STORAGE FACILITY AND BOOSTER PUMPING STATION MUNICIPAL CLASS ENVIRONMENTAL ASSESSMENT

InnServices Utilities Inc. completed a Master Servicing Plan (MSP) update in 2024 which identified short- and long-term strategies for water and wastewater servicing to accommodate population and employment growth outlined in the Innisfil Official Plan (2018). Under Section 9.2 of the MSP, Recommended Water and Wastewater Master Servicing Plan, the project involving the construction of a New Stroud Water Storage Facility and Booster Pumping Station was suggested for implementation under the short-term timeline.

The facility will be supplied by the Lakeshore Water Treatment Plant via the Alcona Reservoir and Booster Pumping Station. The study area is along Yonge Street between the 9<sup>th</sup> Line and Lockhart Road as illustrated on the accompanying map.

The project follows a Schedule B Municipal Class Environmental Assessment (MCEA). A key component of the study is consultation with the public, Indigenous Communities, regulatory agencies, and interested parties, through a Public Information Centre (PIC). The purpose of this PIC is to present and obtain input on the preliminary preferred alternative.

## Public Information Centre

An in-person Public Information Centre will take place on Monday February 9<sup>th</sup>, 2026, from 5:00pm to 7:00pm at the Innisfil Town Hall, located at 2101 Innisfil Beach Road. The PIC will be held in Community Rooms A, B & C on the main floor.

The PIC will be informal and allow all interested parties an opportunity to review the preliminary alternative solutions and provide feedback.

The presentation slides will be available on the InnServices project website after the PIC.
